

FLEXO
INNOVATION CLUSTER

Plastic packaging materials with flexo printing

■ PILLOW-BAG, GUSSET BAGS

From one or multilayer (laminated) or coextrudated foil

Bottom or side gusset bags

Side and/or back sealed

With circular-hole, euro or sponge handle

With resealable edge

With slick

With tearable-edge

With macro or microperforation

■ STANDING POUCH (DOYPACK)

With zipper

With tear notch

With sealed spout

With profile-sealed bags

■ FLAT-FOILS With zipper

One or multilayer (laminated) or coextrudated

Micro or macroperforated

Manual or automatic shrink-foils

■ TUBES

Mono or coextrudated

■ SHOPPING BAGS

T-shirt bags, with sponge or twisted handle

■ SACKS

Paper packaging materials with flexo printing

- Block-bottom and edge folded paper bags
- Windowed bags with edge folded bottom
- Reels for automatic (mechanical) packaging
- Meat wrapping paper sheet
- Coffee sugar (5 g) prepacked in two formats
- Greaseproof paper bags
- Wrapping paper for confectionery sheets and reels

Production of PE films

■ MONO FILMS

Collation shrink film, packaging or automatic film

Flat film, tube and half tube film

With flexo printing on request

■ COEXTRUDATED FILMS

Basic film for one- or multilayer printed and laminated structures

Machine production

■ FLEXOGRAPHIC PRINTING PRESSES

■ PLATE MOUNTERS

■ LAMINATORS

■ ADHESIVE DOSING UNITS

■ SLITTER REWINDERS

OKTOFLEX | PREMIUM

INNOVATION CLUSTER

High quality printed packaging materials at a favourable price

■ The Flexo Innovation Cluster was founded by six Hungarian-owned dynamically developing enterprises with the aim to provide full range of paper and plastic based packaging solutions, mainly for its partners who produce and distribute fast moving consumer goods. The Cluster members -specialized in manufacturing of packaging materials – are capable to take advantage of the cooperation in common technology and flexo printing to which solid technical background and continuous innovation are ensured by machine production within the Cluster.

Paper and plastic packaging materials in one place

■ Constant changes of market requirements encourage members to renew and expand technology related to flexographic printing. In addition to the headquarters in Budapest, there is production at six separate plants that are located near the western, southern and eastern borders ensuring fast service in all directions. The turnover of the group exceeded EUR 20 million in 2013. A significant part of that came from sale outside Hungary and the number of employees reached 250 people.
